

The Donor Program

@ DEMETER FERTILITY

Expanding Families Together

Donor sperm offers the possibility of falling pregnant for:

- women whose partner has a low sperm count
- women who do not have a partner
- women in same sex relationships

At Demeter Fertility we have developed a comprehensive donor sperm program, and using the latest IVF techniques, we have been helping women fall pregnant using donor sperm for decades.

Initial Consultation

First, medical assessment to identify treatable infertility causes. Then counseling, quarantine, and screening procedures to ensure understanding and safety

1

Donor Screening

Donors undergo comprehensive screening: medical and personal history, semen analysis, physical exam, blood/urine tests, and genetic screening

2

No Waiting List

No wait time for donor sperm at Demeter Fertility. Unique supply agreements allow us to source donors in <2 weeks, and personalise to your preferences.

3

Legal Requirements

Many Australian laws have changed over the past decade, making donor sperm difficult to access. But with our comprehensive service, we aim to make this process easier for you

4

Program Costs

We rely on our established relationships to source the best sperm for your needs, with costs around \$2,500 (subject to your circumstances)

5

What next?

Building a family can be a complex journey, but you don't have to navigate it alone. Make an appointment with a fertility specialist at Demeter Fertility to find out more about our Donor Program.
