

Egg Freezing

@ DEMETER FERTILITY

The Power of Choice

Egg freezing is an established fertility procedure whereby patients collect and freeze their eggs, allowing women the opportunity to conceive in the future. This gives a level of protection by facilitating higher pregnancy rates associated with eggs frozen at a younger age.

↑ 806 %

The number of egg freezing cycles rose 806% between 2010-2018 in Australia.

A Simple Step-By-Step

- Attend a specialist consult
- Undergo testing and discuss results
- Recieve treatment plan
- Begin treatment including taking medication, ultrasounds, egg collection and freezing
- Return to the clinic when and if you want to use your eggs!

Cost

Treatment cost can vary from patient to patient and depend on your eligibility for a medicare rebate.

Our one-off cycle cost includes the entire treatment, blood work, ultrasounds, medication and procedure done locally in rooms.

No hospital bills or other doctor fees apply.

What Next?

At Demeter Fertility, we are dedicated to helping you take control of your fertility journey. Your first step is to book an appointment with our experienced fertility team for basic blood and fertility tests, after which we will recommend the best course of treatment for your egg freezing cycle
