

The Over 40's Program

@ DEMETER FERTILITY

A world-renowned specialised fertility program

Demeter Fertility offers a proactive and holistic approach to fertility and IVF for women in their 40s, combining medical and scientific approaches with diet and supplement advice. Their success rates are among the world's best for over-40s. As women age, chances of pregnancy decrease, but Demeter aims to maximize these chances while being transparent about success rates.

On average, a 40 year-old has a

1 in 12 chance

of conceiving naturally. But this can drop to a 1 in 800 chance as you approach 45.

Deteriorating egg quality increases the chance of pregnancy complications and birth defects, so working with the professional and specialist IVF team at Demeter Fertility will ensure you are more in control of your timeline.

A culture of evidence-based innovation and pioneering techniques

The medical approaches to IVF are also a crucial component to the Over 40s program. The types of medications used, dosages required, timing of medications as well as the combination of medications, are all significant factors in achieving optimal results while seeking to minimise side effects for patients.

What next?

Building a family can be a complex journey, but you don't have to navigate it alone. Make and appointment with a fertility specialist at Demeter Fertility to find out more about the Over 40s Program.
