

The Donor Egg Program

@ DEMETER FERTILITY

Expanding Families Together

At Demeter Fertility, our donor egg program offers the possibility of falling pregnant for:

- women with no egg count
- women with poor egg quality
- women in same sex relationships

At Demeter Fertility we have developed a comprehensive donor egg program, and using the latest fertilisation techniques, we have been helping women fall pregnant using donor egg for decades.

1

Initial Consultation

First, medical assessment to identify treatable infertility causes. Then counselling, and screening procedures to ensure understanding and safety

2

Donor Screening

Donors undergo comprehensive screening: medical and personal history, egg analysis, physical exam, blood/urine tests, and genetic screening

3

No Waiting List

Minimal wait time for both counselling and sourcing donor eggs at Demeter Fertility. Unique supply agreements allow us to source donors in <3 weeks, and personalise to your preferences.

4

Legal Requirements

Many Australian laws have changed over the past decade, making donor eggs difficult to access. But with our comprehensive service, we aim to make this process easier for you

5

Program Costs

We rely on our established relationships with world-renowned egg banks, to source the best egg for your needs, with costs subject to your chosen egg bank (from \$6,400 USD)

What next?

Building a family can be a complex journey, but you don't have to navigate it alone. Make an appointment with a fertility specialist at Demeter Fertility to find out more about our Donor Program.
