

Starting with Demeter

All patients will begin their journey by seeing your treating doctor twice, firstly to meet and discuss your situation and secondly to review any blood tests the doctor has requested you undertake and to give you time to consider any information the doctor provided.

Once you have attend both these appointments with the doctor, your journey will be unique to you based on your treatment plan, which may include further doctors consults, donor or nursing consults or into treatments.

REACH OUT

We offer numerous types of treatments and services, this is a general overview of a patient journey. For specific information about our other services like donor eggs or sperm, ovarian rejuvenation, senotherapy and more, reach out to us directly to chat!

4-6 week

2. DO TESTS

Your doctor may ask you to do some blood tests, these can take between 4-6 weeks for results depending on what is recommended for you.

Book when convenient to you

4. NURSE CONSULT

Once you have a treatment plan and recommendations our nurse will discuss with you the specific steps and costs to ensure you understand and decide if you'd like to proceed. This may also include a medication teach session.

1-2 week wait

1. DR CONSULT

Attend an appointment with your chosen specialist either in person or via telehealth. Dr Knight will email you a review summary 1-2 weeks after this appointment.

Book when convenient to you

3. DR CONSULT 2

At this appointment you will discuss any results and what these mean as well as the next steps for treatment.

5. START TREATMENT

Depending on your treatment this may be calling on Day one of your cycle, doing blood tests, taking medication or something else.
