

Ovarian PRP with Demeter

Before undergoing the Ovarian Rejuvenation (PRP) program with Demeter, you will have seen your doctor numerous times to develop a treatment plan and ensure this treatment is appropriate and relevant to you. This process takes place once a treatment plan has been developed and you feel informed and have consented via our treatment consent forms.

Follow instructions provided about attending hospital for your first PRP. Our admin team can answer any questions in regards to this.

UNDERGO PRP1

BOOK PRP 1

PRP 1 takes place in hospital under general anaesthetic. You can book your date with our admin team and pay before the procedure. These can be booked every second Monday.

After seeing the doctor you will have an in-depth discussion with one of our nurses about the next steps and to answer any questions. Usually the same day as your post-op.

NURSE CONSULT

POST OP APPT

The day after the procedure you will have an appointment with Dr Knight to ensure you are recovering normally.

A follow up call with our nursing team to check how you are recovering. There should be minimal discomfort or pain.

CHECK IN

BOOK PRP2

Timed with your next period, we will monitor your hormone levels via blood tests to determine the optimum time. If appropriate this can be booked locally in our procedure rooms, with payment due prior. Approx. half day appt required.

It is recommended you start any fertility cycles within 3 months of your PRPs, this has the highest receptivity and success. This may or may not include transfer embryos and pregnancy tests.

IVF CYCLES

BOOK PRP3

Following the same process as PRP2, blood tests and ultrasounds will determine the best time for your third PRP. Payment is due prior to the procedure.

REPEAT ...

Depending on your goals or outcomes, you may wish to repeat the process for another 3 months and further IVF cycles. In order to do this, you will need to discuss with your treating doctor.
