

Menopur

Store Menopur in a fridge between 2-8 degrees, if you are transporting your medication keep it in a cool bag with an ice pack and put it in the fridge as soon as possible. Once opened you can only use each pen within 28 days.

Checklist

Menopur 1200iu box;
Containing 1x mixing needle
1x powder vial
2x liquid syringes.

Menopur accessories pack;
Containing needles and alcohol swabs).

Preparing

- Remove protective cap from the vial
- Remove rubber cap from the pre-filled syringe and attached the mixing needle
- Insert the needle into the rubber seal of the vial and inject all the solution
- Leaving the needle head in the vial, remove the syringe and attach the second pre-filled syringe and inject all the solution
- Remove the needle and syringe and gently swirl the vial to dissolve all the powder, don't shake. Must be used within 28 days once mixed.

Injecting

- Using one administrative syringe, remove the cap and insert the needle into the rubber cap on the vial
- Draw the liquid up the syringe until you have the correct dosage
- Remove the syringe and needle from the vial and flick the top of the syringe until any air bubbles rise to the top, expel the air from the syringe
- Clean the injection site with an alcohol wipe
- Pinch approximately 5 cm of skin between your thumb and index finger and insert the syringe
- Press the plunger slowly to inject the full contents of the syringe

Dispose of all needles into a sharps bin; The vial will likely have enough for several days injections, store any excess in the fridge and use within 28 days.
